

Amendments to the Claims

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

Claims 1-18 (Cancelled).

19. (Currently amended) A method for treating liver cirrhosis, comprising administering to a patient in need thereof an effective dose of IL-6, or a mutein, isoform, fused protein, functional derivative, active fraction, circularly permuted derivative or a salt thereof, optionally together with a pharmaceutically acceptable carrier to treat liver cirrhosis, wherein the dose is in the range of 0.1 to 10 mcg/kg weight and wherein the fused protein, when present, is IL-6 fused to an immunoglobulin or a fragment thereof, or to gp80 or a fragment thereof.

Claim 20 (Cancelled).

21. (Previously presented) The method according to claim 19, wherein the cirrhosis is compensated cirrhosis.

22. (Previously presented) The method according to claim 19, wherein the cirrhosis is decompensated cirrhosis.

23. (Currently amended) The method according to claim 19, wherein the method of treatment ~~includes~~ comprises liver resection.

Claim 24 (Cancelled).

25. (Previously presented) The method according to claim 19, wherein the dose is about 0.1 mcg/kg or about 1 mcg/kg or about 10 mcg/kg.

Claims 26-27 (Cancelled).

28. (Previously presented) The method according to claim 19, wherein the IL-6, or a mutein, isoform, fused protein, functional derivative, active fraction, circularly permuted derivative or a salt thereof is administered daily or administered once a week or administered three times per week.

Claims 29-30 (Cancelled).

31. (Previously presented) The method according to claim 19, wherein the IL-6 is glycosylated at one or more sites.

32. (Previously presented) The method according to claim 19, wherein the IL-6 is not glycosylated.

33. (Withdrawn-Currently amended) The method according to claim 19, wherein the fused protein ~~comprises~~ is IL-6 fused to an immunoglobulin (Ig) fusion or to a fragment thereof.

34. (Withdrawn-Currently amended) The method according to claim 19, wherein the fused protein ~~comprises~~ is IL-6 and fused to gp80 or to a fragment thereof.

35. (Withdrawn) The method according to claim 19, wherein the functional derivative comprises at least one moiety attached to one or more functional groups which occur as one or more side chains on the amino acid residues.

36. (Withdrawn) The method according to claim 35, wherein the moiety is a polyethylene moiety.

Claims 37-39 (Cancelled).

40. (Currently amended) A method for treating liver cirrhosis ~~including~~ which comprises resection, comprising administering to a patient in need thereof an effective dose of IL-6, a mutein, fused protein, active fraction or circularly permuted derivative thereof to treat liver cirrhosis including

resection, wherein the dose is in the range of 0.1 to 10 mcg/kg weight.

41. (Previously presented) A method for treating liver cirrhosis, comprising administering to a patient in need thereof an effective dose of IL-6, or a mutein, fused protein, active fraction or circularly permuted derivative thereof to treat liver cirrhosis, wherein the dose is in the range of 0.1 to 10 mcg/kg weight.

Claim 42 (Cancelled).

43. (Previously presented) The method of treatment according to claim 41, wherein the patient in need suffers from end stage liver cirrhosis.

44. (Previously presented) The method of treatment according to claim 41, wherein the patient in need suffers from liver cirrhosis after resective liver surgery.

45. (Previously presented) The method of treatment according to claim 41, wherein the patient in need suffers from acute liver cirrhosis.

Claims 46 and 47 (Cancelled).

48. (Previously presented) The method according to claim 40, wherein the administration is carried out before during and/or after resection treatment.

Claim 49 (Cancelled).

50. (Previously presented) The method according to claim 41, wherein the IL-6, or a mutein, isoform, fused protein, functional derivative, active fraction, circularly permuted derivative or a salt thereof is administered daily or administered three times per week or administered once a week.

Claims 51-52 (Cancelled).

53. (Original) The method of treatment according to claim 41, wherein the cirrhosis is severe.

54. (Original) The method of treatment according to claim 41, wherein the cirrhosis is acute.

55. (Previously presented) A method for treating liver cirrhosis followed by engraftment, comprising administering to a patient in need thereof an effective dose of IL-6, a mutein, fused protein, active fraction or circularly permuted derivative thereof to treat liver cirrhosis, wherein the dose is in the range of 0.1 to 10 mcg/kg weight.

Claim 56 (Cancelled).

57. (Previously presented) The method of treatment according to claim 55, wherein the cirrhosis is severe.

58. (Previously presented) The method of treatment according to claim 55, wherein the cirrhosis is acute.

59(Previously presented). The method of claim 55, wherein the cirrhosis is caused by hepatotoxic agents.

60(Previously presented). The method of claim 19, wherein the cirrhosis is caused by hepatotoxic agents.

61(Previously presented). The method of claim 40, wherein the cirrhosis is caused by hepatotoxic agents.

62(Previously presented). The method of claim 41, wherein the cirrhosis is caused by hepatotoxic agents.
